RESEARCH STUDY FOR FEMALES WITH RESTRICTIVE EATING BEHAVIORS

SEEKING YOUNG WOMEN 14-30 YEARS OLD
WHO HAVE MISSED PERIODS IN THE PAST 6 MONTHS

Our Mission:

Our research group aims to further medical research and knowledge regarding the effects of missed periods on cognition. We are seeking to learn whether correcting estrogen deficiency improves mental flexibility and decision-making.

4 TOTAL VISITS OVER 16 WEEKS, INCLUDING:

NEUROIMAGING OF THE BRAIN
NUTRITIONAL EVALUATION
HORMONE EVALUATION
SHORT MEDICAL HISTORY & QUESTIONNAIRES

UP TO \$500 STIPEND AND PARKING/TRANSPORTATION
